GitHub: github.com/amandeep-singh28 Mobile: +91-8923337768

Skills

Languages: Python, C, C++, Java
Frameworks: Scikit-learn
Tools/Platforms: Microsoft Excel, Microsoft Power BI, GitHub, Visual Studio Code
Soft Skills: Analytical Thinking, Leadership, Teamwork

Projects

- **Bank Customer Churn Prediction | GitHub** Oct‘ 25 - Nov‘ 25
  - Developed an end-to-end machine learning pipeline to analyze and predict bank customer churn behavior.
  - Applied class imbalance handling techniques and performed detailed model evaluation to improve recall.
  - Implemented and optimized an extreme gradient boosting model to improve customer retention outcomes.

  Tech used: Python, Pandas, NumPy, Scikit-learn, Imbalanced-Learn, Matplotlib

- **Air Pollution Analytics and Visualization Dashboard | GitHub** Oct’ 25 – Nov‘ 25
  - Analyzed nationwide air quality datasets to identify pollution patterns and derive AQI-based insights actionable.
  - Structured dimensional data models using Power Query and DAX to enable scalable pollution analysis.
  - Visualized pollution levels and AQI categories through an interactive Power BI dashboard with dynamic filters.

  Tech used: Microsoft Power BI

- **Trending Movies Data Analysis and Popularity Prediction | GitHub** Jun‘ 25 – Jul’ 25
  - Focused on analyzing movie metadata and audience metrics to understand trends and predict popularity.
  - Performed data preprocessing, exploratory analysis, and dashboard creation using Python and Power BI.
  - Delivered an interactive analytics dashboard and classification model to identify high and low popularity movies.

  Tech used: Python, Pandas, MySQL, Microsoft Power BI, Matplotlib, Seaborn, Scikit Learn

- **SQLytics Sales Dashboard** | **GitHub** May‘ 25 – Jun‘ 25
  - Centered on analyzing Superstore sales data to uncover business trends and performance insights.
  - Handled data cleaning, SQL querying, and interactive dashboard development using Excel and Power Pivot.
  - Provided clear sales performance insights and KPI visibility through a dynamic, SQL-driven dashboard.

  Tech used: Python, Pandas, MySQL, Microsoft Excel

Training

- **Data Science Using Python | Lovely Professional University | Certificate** Jun’ 25 – Jul‘ 25
  - Executed Structured Query Language operations to efficiently manage, filter, and retrieve structured datasets.
  - Designed Power BI dashboards with interactive visuals to highlight KPIs and performance trends.
  - Utilized Python and foundational machine learning techniques to build and evaluate predictive models.

  Tech used: Python, MySQL, Microsoft Power BI

Certificates

- Cloud Computing | **NPTEL** Apr‘ 25
- Decoding Data Science with Excel and Tableau | **CSE Pathshala** Mar‘ 24

Achievements

- Filed an Intellectual Property Rights patent for a kinetic energy harvesting wireless earbud system. Apr‘ 25
- Earned a 4-star rating in SQL and a 3-star rating in Python on Hacker Rank. Mar‘ 25

Education

- **Lovely Professional University** Phagwara, Punjab
  Bachelor of Technology – Computer Science and Engineering**; CGPA: 8.15** Since August 2023
- **St. Mary’s Senior Secondary School** Haridwar, Uttarakhand
  Intermediate; **Percentage: 77.2%** Apr‘ 22 – Mar‘ 23
- **St. Mary’s Senior Secondary School** Haridwar, Uttarakhand
  Matriculation; **Percentage: 80.6%** Apr‘ 20 – Mar‘ 21
